Research Interests

My research lies at the intersection of software engineering and human–computer interaction. I study how developers work with GenAI coding assistants and agents (e.g., GitHub Copilot, Cursor) in realistic *brownfield* codebases: how they communicate with AI, how they verify and integrate AI-generated code, and whether faster, more correct work also means deeper code comprehension. Through controlled experiments, screen-recorded behavioral analysis, prompt analysis, and interviews, I derive design implications for future AI coding agents and developer tools.

Education

Oregon State University — Corvallis, OR, United States
Ph.D. in Computer Science, School of EECS — *Sep 2023 – Jun 2027 (expected)*
Advisor: Dr. Christopher Hundhausen at the SEAL Lab
Research Areas: Empirical Software Engineering, Human–Computer Interaction, Human–AI Collaboration, Code Comprehension

Arizona State University — Tempe, AZ, United States
M.S. in Software Engineering — *Aug 2021 – May 2023*
Advisor: Dr. Robert LiKamWa
Thesis: Networked System for Volumetric Athletic Coaching in Augmented Reality

Guangxi University of Science and Technology — Liuzhou, China
B.E. in Software Engineering — *Sep 2016 – Jun 2020*

Southern Cross University — Gold Coast, Australia
B.E. in Information Technology — *Sep 2017 – Jun 2020*

Teaching Experience

Graduate Teaching Assistant, School of EECS — Oregon State University
CS 362: Software Engineering II
CS 461: Senior Software Engineering Project
CS 467: Online Capstone Project

CS 492: Mobile Software Development

Professional Experience

Software Engineering Intern, Mocha Software Nanjing, China
Software development *Aug 2020 – Nov 2020*
Developed a conference system for China Mobile Migu Culture & Technology Group with Spring, Spring MVC, and MyBatis, using Ajax to cut page rendering time from 1 s to 0.5 s and dynamic SQL with Redis-backed SSO sessions to reduce search load.

Awards & Scholarships

Oregon State University EECS Graduate Scholarship *2023 – current*
Guangxi University of Science and Technology Merit Award *2018*

Academic Service

Program Committee
ACM Technical Symposium on Computer Science Education (SIGCSE TS), 2027
IEEE International Conference on Software Analysis, Evolution and Reengineering (SANER), 2027

Reviewer
ACM Transactions on Computing Education (TOCE), 2027

Skills & Coursework

Research Methods: Qualitative Analysis, Quantitative Analysis, Interviews, Survey Design
Programming: Python, Java, C, JavaScript, HTML, CSS, SQL, Bash
Frameworks & Tools: React, Express, Flask, MongoDB, PostgreSQL, Git, AWS, Docker, LaTeX, Figma; Claude Code, GitHub Copilot, Cursor, OpenAI Codex
Coursework: Machine Learning; NLP with Deep Learning; Software Engineering for ML; Program Analysis; Algorithms & Data Structures; Human–Computer Interaction; Field Studies in SE & HCI; Methods of Data Analysis

Languages

English (Fluent), Mandarin Chinese (Native)
